

Professional Practice Planning – Plan 1 – From a service with little time and few resources ...

To be able to demonstrate developing Educators skills and knowledge appropriate to our shared goal of moving from 'Meeting' to 'Exceeding'.

We have agreed we need to:

- Understand child development better and use that in our observations and planning
- Understand why relationships and communication are so important to a child’s learning and wellbeing and how we should genuinely support that
- Better understand how to use our observations in our planning
- Spend some time learning about intentional teaching
- Better understand critical reflection – but stop stressing about it – do it better but not through more writing – just better writing.
